Level:
Intermediate

ABOUT the Master Class

In a world increasingly reliant on the use of data for planning and making the best decisions, it is becoming critical for organizations and individuals to engage with data and learn how to communicate results and findings in the most effective way to a team. Teams now need data faster and simpler. In this Master Class we look at how to present programme monitoring data in a dashboard for different teams. We will look at how to combine different data sets into a single interactive data visualization location for your teams.

Anyone wanting to gain confidence in working with data and to improve their visual presentation skills should attend this Master Class. This classes will be especially useful to M&E professionals and others heavily involved in data communication and reporting processes your organization.

What will you gain from this Master Class?

Build the skills to:

- Understand a programmatic or management team data needs
- Identify dashboard types
- Understand the standards of a good dashboard
- Apply basic data processing and visualization steps to create charts for your dashboard
